

The diagram consists of two main parts. On the left, a large horizontal oval contains three lines of source code. On the right, there is a vertical flow graph with two circular nodes. The top node is labeled 'self Read' and the bottom node is labeled 'self Write'. A vertical arrow points from the bottom of the 'self Read' node to the top of the 'self Write' node.

```
source code:  
self = self  
return self.outNeighbors
```

self  
Read

self  
Write
